### PROFILE

I am a recent computer science graduate with a passion for web development. Proficient in HTML, CSS, and JavaScript, I am eager to apply my skills to create engaging and user-friendly websites. Open to learning and adapting to new technologies, I am excited about contributing to innovative projects and growing as a web developer.

### PROJECTS

#### Next.js Dashboard

##### Features

- Dashboard Views: View and analyze data on an interactive dashboard.
- Pagination: Navigate through large datasets with pagination support.
- Searching: Search and filter data for quick access.
- Streaming: Real-time updates and streaming capabilities for dynamic data.
- Partial Rendering: Optimal performance with partial rendering of components.
- Routing: Seamless navigation through different sections of the application.
- CRUD Functionalities: Perform Create, Read, Update, and Delete operations.

#### Car Showcase

##### Features

- Interactive Interface: Users can navigate through various car models with ease.
- Detailed Information: Each car model is accompanied by detailed information, including specifications and images.
- Search Functionality: Users can search for specific car models using the search feature.
- Responsive Design: The application is designed to work well on various devices, including desktops, tablets, and smartphones.
